▶ 3 REASONS WHY YOU SHOULDN'T USE CASH APP & VENMO

They're not meant for Business

1 Cash App & Venmo are subsidiaries to Square and PayPal which means they are meant for peer to peer transactions, where their parent companies are meant for business usage.

It's not Accounting Friendly

2 It's impossible for your Accountant to know what the transactions are for. We don't know who you sent money to or received money from because the bank text does not give any details. In turn, we have to constantly reach out to business owners for these details which can be cumbersome.

It's too risky

3 Because these platforms were not meant for business usage, they are not secure. Both companies will specifically tell you to ONLY make transactions with people you know. You're at much higher risk of fraud and losing your money when you work with people you do not know.

▶ DID YOU KNOW?

Americans spend an average of **\$3,000 per year (\$250/month)** on coffee and lunch at work. Imagine if you put that money towards your 401K, credit card debt or student loans...

▶ CLIENT SPOTLIGHT

Jedi Weller
Founder of Open Forge
(TESTIMONIAL VIDEO)

We Are Passionate About Technology and Design We believe that your success is our success. We're here to challenge your assumptions and help you discover your web or mobile applications full potential.
